ONE MORNING. A REAL START ON OUR AI PROGRAM.

FOR YOUR SUPERVISOR

I am requesting approval to attend the Peritix AI Program Workshop, a free, half-day session for public-sector staff. Our people are already using AI, and we are being asked to account for it. This workshop walks us through how a governed AI program is built, using our own answers, and I will bring back a report and a clear first step for our organization.

WHY IT MATTERS NOW

01 WE MAY NOT KNOW WHAT AI IS DOING HERE

Staff adopted tools that were free and useful, and nobody wrote it down. Most organizations cannot say which AI tools are in use, by whom, or with what data.

02 DATA LEAVING THE BUILDING IS THE REAL RISK

Asked for their biggest AI concern, public-sector leaders most often name sensitive data leaving the organization. That is a governance problem before it is a technology problem.

03 A POLICY IS NOT A PROGRAM

Many organizations have a policy in progress. Few have tied it to an inventory, approved uses, or a way to measure results. This session shows what connects them and why that is critical.

WHY THIS FORMAT WORKS

PEER, NOT PITCH

No one in the room is selling anything. Presentations are vendor agnostic, and everyone attends as a peer.

HANDS-ON AT EACH STAGE

Four exercises, run live on your own phone or laptop. You work the process, not just hear about it.

BUILT ON OUR ANSWERS

What you leave with is drawn from what you and your peers said in the room, not a generic template.

ONE MORNING. FIVE STAGES.

01	02	03	04	05
ASSESS CAPABILITIES	CAPTURE USE CASES	GOVERN WORKFLOWS	MEASURE AND REPORT	OPTIMIZE FOR YOUR PEOPLE

Each stage is taught, then practiced. Amber diamonds mark the hands-on exercises.

8:00	□	CHECK-IN, BREAKFAST AND COFFEE Meet your peers before the session starts.	
8:45	□	WELCOME AND INTRODUCTIONS Get to know the room, and say what you want to take away from the morning.	
9:00	◆	STAGE 1. ASSESS YOUR TEAM'S CAPABILITIES A short baseline on your phone, then where each person sits on the AI Literacy Scale and why that decides what they can safely do with AI.	EXERCISE 1: FIND YOUR LEVEL
9:30	◆	STAGE 2. CAPTURE YOUR USE CASES AND BUSINESS LOGIC The AI tools already in use, approved or not, and the work and decisions people already hand to AI.	EXERCISE 2: MAP YOUR AI
10:00	□	BREAK Fifteen minutes.	
10:15	◆	STAGE 3. GOVERN YOUR WORKFLOWS Policy, data classification and who decides. A captured use case becomes a governed workflow.	EXERCISE 3: GOVERN ONE
11:00	◆	STAGE 4. MEASURE AND REPORT YOUR OUTCOMES How you would know a workflow is working, and what leadership, auditors and insurers need to see. Each attendee sees their own readout.	EXERCISE 4: SCORE IT
11:30	□	STAGE 5. OPTIMIZE FOR YOUR PEOPLE What becomes possible when the work your people do with AI makes AI work better for them, with your data, in an environment only you control.	
12:00	□	LUNCH HOSTED BY AXONIUS One hour with peers, hosts and sponsors.	

THE RETURN

WHAT WE BRING BACK.

AN INDIVIDUAL REPORT

Built from your own answers: your AI literacy level, the use cases you named, and next steps. Delivered within two business days.

4 CPE-ELIGIBLE HOURS

A Peritix certificate of completion for 4 hours of instruction. This session may qualify for continuing education credit with ISC2, ISACA, IAPP and others; consult your certifying body's self-reporting policy.

A NETWORK OF PEERS

Public-sector leaders at different stages of their AI journey, to call on after.

A STARTING POINT FOR OUR PROGRAM

A first governed workflow and a clear view of where our organization stands across the five stages.

A PRINTED AI PROGRAM GUIDE

The five stages and the exercises, to keep and share with our team.

Employees are already using AI and almost no organization can say where, by whom, or with what data. Peritix is the platform for the human layer of AI. We assess what your people can do and capture what they are already doing. Effort becomes approved workflows bound to policy, governed and measured for AI utilization at scale. The shadow AI no one sees becomes valuable work you can measure and prove to a board, an insurer, or a regulator.
